## About InterGlobal Consultores en Sistemas

In Interglobal Consultores en Sistemas we create solutions based on technologies of the information for all the areas of the industry with more than 17 years creating IT solutions for the industry.

We have been working with several Mexican companies and with 2 international german companies in México:

AUTOMOTIVE SYSTEMS

Work with them with: Software developments, Hardware & software on production line improvements, Outsourcing IT services.

Work with them with: Real time Visual alarm connected to a Oracle Database.

## OUR PRODUCTS

- **Customized big data analysis tool for any area.**
- **Automated daily management reports by email. (Sales, Production, Scrap, etc...) also can be weekly, or monthly.**
- **ERP (Enterprise Resource Planning) Software Implementation (Odo) and creation of customized modules.**
- **Creation of customized ERP connectors.**
- **Creation of automated production line processes using open source hardware and/or programmable boards.**

## OUR PRODUCTS

- **Software & Hardware to automate the packing process on a production line with connection to SAP (ERP) and avoiding labeling errors.**
- **Software & Hardware to print automatically any kind of label with any kind of printer connected to a production machine.**
- **Customized Software & Hardware Development.**

## OUR COMPETITIVE ADVANTAGES

We promote the use of high performance open source software, allowing customized solutions tailored to your processes, with a total cost of ownership extremely low and more secure than the proprietary software.

Our solutions are from 40% to 50% more cheaper than the most common software (ERP, Big Data tools, etc... depending on the data size) with the same or best quality.

Our solutions are working from several years in some companies without stop. ( For example, Kayser Automotive Systems in México )

## COOPERATION PROPOSAL

- **Create strategic alliances to find the best solutions to the new challenges of the industry.**
- **Create large relationships with our customers, helping them to grow and grow with them.**
